This list was compiled on 18 April 2014. For more recent volumes see the Ray Society's current [Publications](#) web page.

Availability is given as via the Ray Society for new copies. Many out of print (O/P) original volumes are still available from antiquarian and second-hand book dealers. Most early volumes, for which the Ray Society's copyright has expired, have been scanned for the Open Library, Biodiversity Heritage Library and other web-based providers and can be viewed on-line. Where on-line versions are known links are provided above. If no on-line copy is currently known, [n/a] indicates 'not available'. For copyright reasons this notation has not been used for works later than 1924.

In the titles the original use of Roman numerals ('Vol. III, Part II') has been replaced here by Arabic numerals ('Vol. 3, Part 2') for clarity.

Volume numbers do not always follow a chronological sequence. For example, volume 43 appeared in 1867, volume 42 appeared in 1868. Volumes 177 and 178 were published in 2013, volumes 175 and 176 are expected to be published in 2014.

In some volumes the year printed on the binding was not the year of eventual publication. Some works were reprinted in subsequent years and reprints carry the later date. In the list here, the year of original publication (as far as can be determined) is given. Acknowledgement is due to the late Richard Curle for his excellent summary of such matters in his book *The Ray Society a Bibliographical History* (dust jacket title *A Bibliographical History of the Ray Society*) published by the Society for its members in 1954.
